This new printing technique allows clients to instantly download copies to their phone and immediately follow up their print job with a phone call or email. Dropbox is a cloud storage app that allows users to have all their files and documents easily and securely stored within the cloud. The new printing technique allows customers to login with

The first advantage is that the customer is able to see a copy of their document immediately instead of having to wait a few days for a fax to be received. The second advantage is that a customer no longer has to have a working printer and electricity to send the job to be printed. There is no need to re-dock the printer after it has been used and no electricity is

required to print the documents. At the end of the day, the new printing technique was only possible because of the popularity of a cloud based storage service. Although the service is not cheap, the fact that a large number of people use the service does
